
Dilavato [washed stone] Specification Details.

Description

This is a lime based textured plaster finish that requires special skills and experienced application to achieve good high quality end results. Applications and products are provided directly from Walleffects ltd. Dilavato has a slightly rough textured surface which offers the appearance of plaster that has been washed and weathered over many years.

Site Name

[Add you site location here]

Areas to receive specialist finishes

[Add description here of all areas to be finished]

Drawings

[Add drawing reference number etc]

Substrate

[Add your preferred substrate here with a reference to the relevant data sheet.]

Render, drylined surfaces, plaster board are all suitable please check the substrate documents for more advice. Substrates all need to be fully dry, free from dust, dirt, moisture, straight, plumb and with no bumps or ridges.

Please check our substrate documents for more details or email our technical adviser tech@wallevffects.co.uk.

Finish

Washed stone effects.

Colour

Colour no *[add our colour number here]*

Sample reference *[add number here]*

Custom colours *[add a reference here, ie RAL or paint number]*

Plaster finishes are not a uniform colour and will have natural shade variations. Small samples may not show this.

Thickness

2mm to 3mm

Programme

Application times will vary depending on the specific project. Finishes need to be applied late in the construction normally when decorating is taking place. Applications are normally booked 8 weeks in advance. Dilavato has a minimum 2 days application time due to the various required layers. Please contact Walleffects for specific application times:
