
Paint Effects Maintenance Information

Cleaning of Paint type finishes

The Walleffects range of paints require very little maintenance other than wiping with a soft cloth. Soap and water can be used if required. We recommend that a tile or wood is used at the bottom of walls to protect from cleaning machines and mops.

Damages.

The Walleffects range of paint finishes are tough but can be damaged. If damage occurs we advise it is repaired as soon as possible to reduce the risk of future damage. This can be done by Walleffects applicators or by touch up kits which can be supplied by us. In areas of high traffic wear and tear should be monitored as repairs and extra protection are easily done in the early stages.

This document was created as a general guide for using Walleffects Ltd to complete projects and to help with specifications. This is a general overview and offers no guarantee for any problems that may arise.
