
Metallic Effects Specification Details.

Description

This is an acrylic paint like finish created from a textured base coat and finished with special metallic top coats. These finishes require special skills and experienced application to achieve good high quality end results. Applications and products are provided directly from Walleffects ltd. Metallic Effects offer a vast range of options for stunning results.

Site Name

[Add you site location here]

Areas to receive specialist finishes

[Add description here of all areas to be finished]

Drawings

[Add drawing reference number etc]

Substrate

[Add your preferred substrate here with a reference to the relevant data sheet.]

Render, drylined surfaces, plaster board or previously decorated surfaces are all suitable. Substrates all need to be fully dry, free from dust, dirt, oil, salts, moisture, straight, plumb and with no bumps or ridges.

Please check our paints substrate documents for more details or email our technical adviser tech@walleffects.co.uk.

Finish

[Add finish here]

Sea Sponged, combed, ridge, spatula or as per sample

Colour

Finish *[add reference taken from colour chart]*

Sample reference *[adds number or name here]*

Most finishes are custom and we recommend picking from a sample for this style. Walleffects finishes are not a uniform colour and will have natural shade variations. Small samples may not show this.

Thickness

Paint like or per textured sample.

Programme

Application times will vary depending on the specific project. Finishes need to be applied late in the construction normally when decorating is taking place. Applications are normally booked 8 weeks in advance. The Metallic Effects has a minimum 2 days application time due to the various required layers. Please contact Walleffects for specific application times.
